REASONS FOR ALLOWANCE

The following is a statement of reasons for the indication of allowable subject matter:

The claims 25,59,65 and 88 in the instant application have not been rejected using prior art because no references, or reasonable combination thereof, could be found which disclose or suggest a cutting instrument comprising: an outer member has an opening bounded by a sharp cutting edge, a helical knife coupled to the outer member for rotation relative to the outer member, where the helical knife has a flat surface at a distal end of the helical knife, and where the helical knife has an edge configured to slice into tough, fibrous tissue, where the helical knife edge is arranged relative to the cutting edge such that the edges align in a plane substantially perpendicular to a longitudinal axis of the instrument to create a shearing action therebetween. As to claims 42 and 82, the prior art does not teach the invention including: an outer member has an opening bounded by a cutting edge, an inner member received in the outer member for rotation, where the inner member includes a shaft having a helical knife defining a sharp, slicing edge, and where the helical knife has a flat surface at a distal end of the helical knife, the slicing edge has a V-shaped cross section perpendicular to a longitudinal extend of the slicing edge. As to claim 64, the prior art does not teach the invention including: an outer member has an opening bounded by a sharp cutting edge, where an inner member received within the outer member, the helical knife located at a distal portion of the inner member, the inner member has a wall defining a hollow interior, where the inner member defines an aspiration opening through the wall of the inner member to the hollow interior, the aspiration opening being located at a proximal portion of the helical knife.
